

THE UNIVERSITY OF TEXAS AT AUSTIN
Cockrell School of Engineering
Resume

FULL NAME: David Fridovich-Keil **TITLE:** Assistant Professor

DEPARTMENT: Aerospace Engineering and Engineering Mechanics

EDUCATION

Princeton University	Electrical Engineering	B.S.E.	2015
University of California, Berkeley	Electrical Engineering & Computer Sciences	Ph.D.	2020

CURRENT AND PREVIOUS ACADEMIC POSITIONS

Assistant Professor, The University of Texas at Austin August 2021 - present
 Department of Aerospace Engineering and Engineering Mechanics
 Director of the Control and Learning for Autonomous Robotics (CLeAR) Lab

Post-Doctoral Researcher, Stanford University September 2020 - June 2021

Post-Doctoral Researcher, University of California, Berkeley June 2020 - August 2020

Graduate Research Assistant, University of California, Berkeley August 2017 - May 2020

OTHER PROFESSIONAL EXPERIENCE

Software Engineer, Nuro Inc. Summer 2018
 Motion planning and prediction algorithm development for autonomous vehicles.

Software Engineer, Applied Science & Technology Research Institute Summer 2014
 Image processing for consumer electronics.

Embedded Systems Engineer, Sentinel Photonics Summer 2013
 Signal processing for lightweight, high-precision gas sensing.

MEMBERSHIPS IN PROFESSIONAL AND HONORARY SOCIETIES

Member, Institute of Electrical and Electronics Engineers (IEEE)

**PROFESSIONAL SOCIETY AND MAJOR GOVERNMENTAL COMMITTEES,
 EDITORIAL BOARDS, AND CONFERENCES ORGANIZED/CHAIR**

Conference Activities: Organizer

Workshop on Robust Autonomy: Tools for Safety in Real-World Uncertain Environments, Robotics: Science & Systems (RSS), 2019-2021

Conference Activities: Editor

Associate Editor, IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS), 2022

Conference Activities: Program Committee

Distributed Autonomous Robotic Systems (DARS), 2022

IFAC Workshop on Cyber-Physical Human Systems, 2022

Uncertainty in Artificial Intelligence (UAI), 2022

Learning for Dynamics and Control (L4DC), 2022

OTHER PROFESSIONAL HIGHLIGHTS

Current Review Activities

IEEE Transactions on Automatic Control

IEEE Transactions on Robotics

IEEE Transactions on Intelligent Vehicles

Optimization Methods and Software

Robotics: Science & Systems

IEEE Robotics and Automation Letters

IEEE International Conference on Robotics and Automation

IEEE Conference on Decision and Control

IEEE Conference on Control Technology and Applications

Learning for Dynamics and Control

American Control Conference

Advances in Neural Information Systems

International Conference on Learning Representations

UNIVERSITY COMMITTEES/ADMINISTRATIVE ASSIGNMENTS

Department Committees

Diversity, Equity, and Inclusion Committee, 2021-present

Texas Robotics

Robotics Building Space Committee, 2022-present

Core Robotics Faculty Committee, 2021-present

HONORS AND AWARDS

Demetri Angelakos Memorial Achievement Award, 2020

Robotics: Science & Systems Pioneer, 2019

Top Reviewer at NeurIPS, 2019

Outstanding Graduate Student Instructor, 2018

Charles Ira Young Memorial Prize, 2015

G. David Forney Jr. Prize, 2015

James Hayes-Edger Palmer Prize, 2015

NSF Graduate Research Fellowship, 2015

- W2 D. Fridovich-Keil, “FaSTrack: Fast and safe tracking,” 2018

RESEARCH TOPICS

Posing interactive motion planning problems as multi-player, noncooperative dynamic games and designing efficient algorithms to solve them. Additionally, building a rapprochement between machine learning methods and classical techniques for robust, adaptive, and geometric control.

PH.D. SUPERVISION IN PROGRESS

- 1. Hamzah Khan
- 2. Jonathan Salfity
- 3. Fernando Palafox

M.S. SUPERVISION IN PROGRESS

1. Junette Hsin
2. Yujing Zhou

OTHER STUDENT RESEARCH COMMITTEES (Current)

Ph.D. Defense Committees - 4

M.S. Committees - 2

OTHER RESEARCH SUPERVISION

Ph.D. Qualifying Committees

David Fridovich-Keil, Assistant Professor

The University of Texas at Austin

Department of Aerospace Engineering and Engineering Mechanics

Dr. David Fridovich-Keil is the Director of the Control and Learning for Autonomous Robotics (CLeAR) Laboratory, and a core member of the UT Robotics faculty. He received his B.S.E. in Electrical Engineering from Princeton University and his Ph.D. in Electrical Engineering & Computer Sciences from the University of California, Berkeley. His research spans optimal control, dynamic game theory, learning for control and robot safety, and his Ph.D. dissertation proposed some of the first efficient techniques for solving noncooperative, game-theoretic motion planning problems.
