Dr. David Fridovich-Keil is the Director of the Control and Learning for Autonomous Robotics (CLeAR) Laboratory, and a core member of the UT Robotics faculty. He received his B.S.E. in Electrical Engineering from Princeton University and his Ph.D. in Electrical Engineering & Computer Sciences from the University of California, Berkeley. His research spans optimal control, dynamic game theory, learning for control and robot safety, and his Ph.D. dissertation proposed some of the first efficient techniques for solving noncooperative, game-theoretic motion planning problems.
